Volunteer Role and Competition Job Description:

Position: Tech Career Mentor - Volunteer

Role Overview:
As a Tech Career Mentor, you will play a pivotal role in shaping the future of young individuals in Lagos State by providing them with the opportunity to embark on a transformative tech career journey. Through your guidance and support, these aspiring tech enthusiasts will receive free 6-month training and mentorship, setting them on a path to becoming certified interns in the tech industry.

Responsibilities:
- Community Engagement: Engage with local schools, educational institutions, and community centers to promote the Flip to Tech initiative and encourage enrollment.

- Training and Facilitation: Undergo a comprehensive 3-month training program to become a skilled tech educator. After training, you will conduct tech training sessions in your assigned Place of Primary Assignment (PPA) for a period of 6 months.

- Enrollment of Schools: Enroll a minimum of 20 schools within your community onto the Flip to Tech platform. These schools will be your primary assignment for training and mentorship.

Upon the completion of each school onboarding on the Flip to Tech platform, a comprehensive database of the children in the total number of children in each school will be enlisted under each intern's platform. The children's scorecards and growth will be used to measure each intern's impact on their community. This measurement forms the competition model and requirement for the program.

- Curriculum Delivery: Implement the structured tech curriculum provided by Flip to Tech, ensuring students receive high-quality training in various tech skills, programming languages, and digital literacy.

- Mentorship: Provide guidance, mentorship, and support to students as they navigate their tech learning journey, helping them overcome challenges and fostering their passion for technology.

- Progress Tracking: Monitor and assess students' progress throughout the training period, identifying areas for improvement and tailoring instruction as needed.

Qualifications:
- Passion for technology and a strong desire to empower young individuals with valuable tech skills.

- Strong communication and presentation skills to effectively teach and engage with students.

- Willingness to learn and adapt to new teaching methodologies and tech trends.

- Ability to work collaboratively within a team of mentors and trainers.

- Dedication to making a positive impact in your community.

Metrics for Competition / Job Description:
Key Metrics:
– School Enrollments: Successfully enroll a minimum of 20 schools within your community onto the Flip to Tech platform.

– Student Completion: Ensure that all enrolled students complete the 6-month training program and achieve the required proficiency levels in tech skills.

- Training Impact: Measure the progress and impact of your training through regular assessments, student feedback, and improvement in their tech skills.

 - Mentorship Quality: Provide effective mentorship and support to students, as reflected in positive feedback and improvements in their confidence and understanding of technology.

- Community Engagement: Actively engage with local educational institutions, community centers, and relevant stakeholders to promote the Flip to Tech initiative

Rewards and Incentives:
 - Upon successful completion of the initial 6-month training period and achievement of key metrics:

- Receive a laptop to support your own tech career development.

- Earn a monthly stipend of N40,000 for 6 months following the completion of the first 6 months of training for your dedication and commitment to fostering tech education in your community.

Join us in our mission to empower the youth of Lagos State, bridge the digital divide, and create a thriving tech ecosystem that benefits both individuals and the entire community. Your role as a Tech Career Mentor is essential in realizing this vision. Together, we can build a brighter future through technology education.
